CAREER OBJECTIVE

Results-driven Full Stack Developer seeking a challenging role to apply my expertise in modern Angular (Standalone Components, Signals, SSR, RxJS, NgRx) and backend technologies (Node.js, Express.js, MongoDB) to build fast, scalable, and secure enterprise web applications. Committed to driving end-to-end feature delivery, optimizing performance, and maintaining clean, architecturally sound code across the entire stack.

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building enterprise-grade web applications using Angular, TypeScript, Node.js, Express.js, and MongoDB. Proven track record of leading complex frontend modernization (Angular v1 3 to v21) while simultaneously designing and developing robust, scalable backend RESTful APIs and database architectures. Adept at implementing end-to-end features, including JWT authentication, role-based access control, state management (NgRx/Signals), and CI/CD-integrated deployments. Strong collaborator in Agile/Scrum environments, bridging the gap between UI/UX and backend data logic.

TECHNICAL SKILLS

Backend	Node.js, Express.js, RESTful API Design, JWT Authentication, Middleware, Error Handling
Database	MongoDB, Mongoose, Schema Design, Indexing, Aggregation Pipelines
Frontend	Angular (v1 3 to v21), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Responsive Design, Flexbox, Grid
Modern Angular	Standalone Components, Signals, SSR & Hydration, Typed Reactive Forms, New Control Flow (@if, @for), Deferrable Views (@defer), Functional Guards/Interceptors
State & Async	NgRx (Store, Actions, Reducers, Effects, Selectors), Signals-based state, RxJS Operators
UI & Tools	Angular Material, Bootstrap, Tailwind CSS, Git, GitHub, Postman, CI/CD Pipelines, Jasmine/Karma, Agile/JIRA

WORK EXPERIENCE

Full Stack Developer | SmartConnectt Technologies — Dec 2024 – Jul 2026

- Developed and maintained end-to-end features for the Hub Admin platform, a centralized enterprise system for configuring and managing 1 5+ business products across telecom, banking, and insurance domains.
- **Backend Development:** Designed and built scalable RESTful APIs using Node.js and Express.js, implementing secure middleware, JWT-based authentication, and role-based access control (RBAC).
- **Database Management:** Modeled complex, multi-tenant data schemas in MongoDB using Mongoose, optimizing queries and aggregation pipelines for high-performance data retrieval.
- **Frontend Modernization:** Led the Angular upgrade from v1 3 to v21 using ng update schematics; adopted Standalone Components, Signals, and @if/@for control flow with zero production downtime.
- Implemented advanced state management using NgRx and RxJS for complex workflows, ensuring predictable data flow and efficient change detection between frontend and backend services.
- Built reusable UI modules with Angular Material supporting LINK Service Assist and POLL products; enhanced CI/CD build pipelines for automated, reliable deployments.

Angular Developer | Paptronics Pvt Ltd Mar 2022 – Oct 2023

- Developed responsive, dynamic UI for education domain projects (Exams and Timetable modules) using Angular v1 3+ and Bootstrap, integrating seamlessly with backend REST APIs.
- Participated in the Angular upgrade from v1 2 to v1 3, resolving View Engine deprecation and removing legacy entryComponents declarations.
- Translated complex business requirements into structured, maintainable Angular features, reducing rework and improving client satisfaction.
- Collaborated closely with backend developers and QA testers to ensure smooth API integration, data validation, and timely milestone deliveries.

KEY PROJECTS

Hub Admin Platform (UNFYD Hub) | SmartConnectt Technologies

Tech Stack: Angular (v1 3–v21), Node.js, Express.js, MongoDB, TypeScript, NgRx, RxJS, Signals, Angular Material, CI/CD

- Architected and developed a centralized, multi-tenant enterprise admin system for configuring and managing 1 5+ products.
- **Full Stack Implementation:** Built robust backend services using Node.js and Express.js, with MongoDB serving as the primary database for product configurations, user management, and system settings.
- Designed optimized MongoDB schemas and implemented secure API endpoints with JWT authentication, seamlessly consumed by the Angular frontend via HttpClient/provideHttpClient().
- Upgraded frontend application from Angular v1 3 to v21 with zero production downtime, migrating to Typed Reactive Forms, Standalone APIs, and modern control flow.
- Developed reusable, authentication-aware UI components and implemented NgRx-based state management for complex, data-intensive workflows.

Education Management System | Paptronics Pvt Ltd

Tech Stack: Angular v1 3+, TypeScript, Bootstrap, HTML, CSS, REST APIs

- Developed Exams and Timetable modules featuring dynamic timetable generation and exam scheduling through efficient REST API integration.
- Delivered mobile-responsive layouts and actively contributed to the Angular v1 2 to v1 3 migration, ensuring compatibility and performance improvements.

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Telecommunication (ENTC) 201 9

Sant Gadge Baba Amravati University | CGPA: 7.0
